

## TankIntro™ courses

---

The **TankIntro™** training course provides an introductory overview of industrial scale above ground steel storage tanks and the risks they pose. Attendees have the opportunity to gain a general awareness and appreciation of the need for tank integrity assessment, why it is done, and the general principles of what is involved, without going into any detailed calculations.

**TankIntro™** is recommended for all levels of employees including technicians, managers, graduate or other engineers who are just starting to work with tanks, as well as tank farm managers, safety representatives and supervisors involved in recruiting tank integrity assessors and conducting their performance reviews.

Courses are held in the UK (in English), France (in French) and the Netherlands (in Dutch). Full details are available on the EEMUA website: [www.eemua.org](http://www.eemua.org)
