

## Contents

<b>Preface</b> .....	<b>ix</b>
<b>1. Introduction and use of Specification</b> .....	<b>1</b>
1.1 Scope.....	1
1.2 Division of responsibilities .....	1
1.2.1 The Principal.....	1
1.2.2 The Contractor.....	2
1.2.3 The Equipment Vendor.....	3
1.3 Special consideration .....	4
1.4 Notation and definitions .....	4
<b>2. Measurement and reporting of equipment noise</b> .....	<b>9</b>
2.1 Measuring equipment .....	9
2.2 General requirements for measurements.....	9
2.2.1 Measurements .....	9
2.2.2 Sound-level meter and sound intensity meter calibration .....	9
2.2.3 Measurement of background noise.....	10
2.2.4 Measurement of fluctuating noise levels.....	10
2.2.5 Test conditions.....	10
2.2.6 Precision .....	10
2.3 Sound-pressure level measurements.....	10
2.4 Sound-power level determination for equipment.....	10
2.4.1 The small source method.....	14
2.4.2 The large source method .....	17
2.4.3 The sound intensity method.....	22
2.4.4 Special techniques for the determination of sound-power level.....	25
2.5 Modifications to these procedures .....	28
2.6 Test reporting.....	29
<b>3. Calculation methods and procedures</b> .....	<b>31</b>
3.1 General calculations .....	31
3.1.1 General.....	31
3.1.2 Addition/subtraction of sound-pressure levels or sound-power levels.....	31
3.1.3 Calculation of mean sound-pressure level .....	31
3.1.4 Correction for background noise .....	32
3.1.5 A-weighting.....	33
3.1.6 Calculation of equivalent continuous sound level .....	33
3.2 Calculation of sound-power level .....	33
3.2.1 Small-sound method.....	33
3.2.2 Large-sound method.....	34
3.2.3 Correction for semi-reverberant test environment.....	36
3.2.4 Calculation of sound-power from sound intensity measurements .....	38
3.2.5 Calculation of sound-power level from vibration measurements .....	38
3.2.6 Calculation of the sound-power level of linear sources .....	39
3.2.7 Calculation of sound-power at a fan intake or discharge.....	39
3.2.8 Calculations of directivity index .....	40
3.3 Calculation of sound-pressure levels from sound-power levels .....	41
3.3.1 Aspects of sound prorogation .....	41
3.3.2 Estimation of noise levels within plant area .....	44
3.3.3 Estimation of noise levels at remote areas .....	44
<b>4. Noise limits for complete plant</b> .....	<b>47</b>
4.1 Broad-band noise.....	47
4.2 Modifications for narrow-band or impulsive noise .....	47

<b>5. Equipment noise limits .....</b>	<b>49</b>
5.1 Contractor’s specifications .....	49
5.2 Locations for limits .....	49
5.3 Equipment components.....	49
5.4 Noise control .....	49
5.5 Narrow-band and impulsive noise.....	49
5.6 Fluctuating or intermittent noise.....	49
5.7 Special limits .....	50
<b>6. Acceptance testing .....</b>	<b>51</b>
6.1 Noise levels.....	51
6.1.1 General.....	51
6.1.2 Work area noise.....	51
6.1.3 Neighbourhood noise .....	51
6.2 Equipment sound-power levels.....	51
<b>Appendix A Correction for a reverberant test environment .....</b>	<b>53</b>
<b>Appendix B Vibration measurements using a sound-level meter ....</b>	<b>55</b>
B1 The radiation efficiency of a randomly vibrating plate .....	55
B2 Calibration and measurements.....	56
B2.1 The measurement of vibratory velocity.....	56
B2.2 The measurement of vibratory-velocity level .....	57
<b>Appendix C Determining sound-power levels of complete plants ...</b>	<b>59</b>
C1 Contour measurement at ground level .....	60
C2 Measurements on an enveloping surface .....	61
<b>Appendix D Model formats for specifying noise limits .....</b>	<b>63</b>
D1 Noise limits for complete plant.....	63
D1.1 Plant application .....	63
D1.2 Overriding limits .....	63
D1.3 Limits for broad-band noise .....	63
D1.4 Modifications for narrow-band or impulsive noise.....	63
D1.5 Tabulation of noise limits for complete plant .....	65
D2 Equipment noise limits .....	66
D2.1 Application of noise limits.....	66
D2.2 Requirements .....	67
D2.3 Noise limits .....	67
D2.4 Information to be provided by the vendor.....	68
<b>Appendix E Narrow-band noise .....</b>	<b>71</b>
E1 General .....	71
E2 Application .....	71
E2.1 Octave-band level method.....	71
E2.2 Narrow-band analysis method.....	72
E2.3 No external masking noise.....	73
<b>Appendix F The calculation of neighbourhood noise.....</b>	<b>75</b>
F1 Sound-power level at a point in the neighbourhood .....	75
F1.1 Air absorption .....	75
F1.2 Ground effects .....	75
F1.3 Screens.....	76
<b>Appendix G The directivity index for large sources.....</b>	<b>77</b>
<b>References .....</b>	<b>79</b>
<b>Bibliography .....</b>	<b>81</b>

## Figures

Figure 1 Flow chart for determination of sound-power level .....	13
Figure 2 Small-source method .....	16
Figure 3 Large source method - continued in Figure 4 .....	18
Figure 4 Large-source method: with evenly distributed radiation.....	19
Figure 5 Flow chart showing the most appropriate international Standards for determining sound power levels .....	23
Figure 6 Linear sources: typical measuring positions .....	27
Figure 7 Addition and subtraction of sound levels.....	32
Figure 8 Correction E3 for a conformal surface from a cuboid .....	36
Figure 9 Correction for semi-reverberant test environment.....	37
Figure 10 Determining sound-pressure levels in a semi-reverberant room .....	43
Figure 11 Estimation of sound-pressure level near large sources .....	43
Figure 12 Determination of correction E <sub>2</sub> for reverberation environment.....	54
Figure 13 Ground effects: minimal screening.....	59
Figure 14 Ground effects: significant screening.....	59
Figure 15 Audibility threshold of pure tone above 1 Hz spectrum.....	71
Figure 16 Attenuation factor, K (dB) .....	76
Figure 17 Plan of large source showing directivity indices.....	77

## Tables

Table 1 Addition of sound power levels.....	31
Table 2 Correction of background noise .....	33
Table 3 A-weighting values.....	33
Table 4 Near-field correction values .....	35
Table 5 Correction for near-field error – linear sources .....	39
Table 6 Correction for near-field error at a distance from source .....	40
Table 7 Sound-pressure level limits (dB re $2 \times 10^{-5}$ N/m <sup>2</sup> ).....	67
Table 8 Sound-power level limits (dB re $10^{-12}$ W).....	67
Table 9 Reductions to sound-pressure level limits .....	67
Table 10 Modified sound-power level limits .....	68
Table 11 Tabulated data to be provided by the Vendor .....	69
Table 12 Audible narrow band noise levels.....	72
