

Contents

1. Introduction	1
1.1 Purpose of this Publication	1
1.2 Questions to be addressed	1
2. Definitions.....	5
3. Classifying analysers using a risk based approach	9
3.1 Safety protection	11
3.2 Environmental protection	11
3.3 Asset protection	13
3.4 Profit maximisation	13
3.5 Performance target	14
3.6 Maintenance priority.....	15
3.7 Support priority	15
4. Maintenance strategies	17
4.1 Introduction	17
4.2 Reliability Centred Maintenance (RCM).....	17
4.2.1 Reactive maintenance	17
4.2.2 Preventative or Planned Maintenance (PM)	18
4.2.3 Condition based strategy	18
4.2.4 Proactive maintenance.....	19
4.2.5 Optimising maintenance strategy	19
4.3 Management systems/organisation.....	20
4.4 Training/competency.....	22
4.4.1 Training needs	22
4.4.2 Selecting trainees	22
4.4.3 Types of training.....	23
4.4.4 Vendor training	23
4.4.5 Classroom training	23
4.4.6 Technical societies	23
4.4.7 User training	24
4.4.8 Retraining.....	25
4.5 Optimal resourcing.....	25
4.5.1 Equivalent Analyser per Technician (EQAT) calculation method	25
4.5.2 Ideal number of technicians	26
4.5.3 In-house or contracted out maintenance	27
4.5.4 Off-site technical support requirement	28
4.6 Best practice benchmarking	28
4.7 Annual analyser Key Performance Indicator (KPI) review	28
5. Analyser performance monitoring	31
5.1 Introduction	31
5.2 Recording failures - reason/history codes	31
5.2.1 Typical failure pattern.....	32
5.3 SPC/proof checking	34
5.3.1 Analyser control charting	34
5.3.2 Control chart uncertainty limits	36
5.4 Analyser performance indicators	37
5.4.1 Key Performance Indicators (KPI).....	37
5.4.2 Additional analyser performance indicators	38
5.4.3 Points to consider in measurement of analyser availability	40
5.4.4 Points to consider in measurement of operator utilisation	42
5.4.5 Points to consider in measurement of analyser benefit value	42
5.4.6 Deriving availability, utilisation and benefit measurement	43

5.4.7 Optimising analyser performance targets	44
5.4.8 Analyser maintenance cost against benefit	48
5.5 Analyser performance reporting	49
Appendix 1. Equivalent Analyser per Technician (EQAT)	51
Part 1 Calculated technician number worksheet	51
Part 2 Equivalent analyser inventory worksheet calculation methodology.....	52
Part 3 Equivalent analyser inventory worksheet	53
Appendix 2. Example interpretation of control chart readings	59
Appendix 3. Determination of control chart limits by measuring standard deviations of differences	61
Appendix 4. Adopting a maintenance strategy	63
Appendix 5. Example of analyser maintenance cost against benefit.....	65
Appendix 6. Typical results of analyser performance	69
References and Bibliography	71

Figures

Figure 1 Interrelationships of subject matter in this Publication	vii
Figure 2 Generalized risk graph	9
Figure 3 Failure mode pattern	19
Figure 4 Organisation of analyser functions	21
Figure 5 Relative maintenance costs	27
Figure 6 Life cycle diagram	33
Figure 7 Reliability centred maintenance failure patterns	33
Figure 8 Control charting diagram.....	35
Figure 9 Examples of analyser results	36
Figure 10 Example of control charting with linear interpretation	41
Figure 11 Deriving availability, utilisation and benefit measurement.....	43

Tables

Table 1 Typical application of elements in the risk graph	10
Table 2 Best practice availability targets.....	15
