

EEMUA e-learning

Interactive, engaging content covering current and important issues in industrial engineering

Built by industry, for industry from 75 years of hard lessons learned on high hazard sites

EEMUA's Awareness-level training modules help company employees, contingent workers and contractors understand the basics of the key areas of engineering required in the safe operation of onshore and offshore industrial assets.

- Short courses (30-90 minutes) offering introductions to guidance and good practice across a wide variety of asset integrity topics.
- Fully responsive modules that can be taken at the learner's convenience and pace.
- A downloadable certificate is provided on passing the test of understanding at the end of each course.
- EEMUA e-learning has been adopted by many companies to onboard employees or for staff changing functional areas.
- Encourages employees to seek, share, and apply new knowledge and skills to grow themselves along with their teams/organisation.
- Suitable for engineers, technicians, operators and business unit managers.
- Increasingly integral to company development schemes such as graduate trainee programmes.
- Standardised approach to learning that provides the entry points to specific EEMUA Basic application and Practitioner level courses in areas such as Mechanical Integrity and Storage Tanks.
- Built from EEMUA guidance publications with course quality overseen by EEMUA Technical Panels for each module.
- Available to all; free to EEMUA Members as a highly valued benefit of membership and at a reduced rate for Associates.

More and more companies/sites are recognising the value of EEMUA's awareness level e-learning and are mandating modules for the development of their employees/teams. Recent examples include:

- An international senior leadership team taking the Process Safety Management module.
- An engineering group taking the Pressure Testing module to support the incorporation of EEMUA 168 into company procedures.

Modules available:

Alarm Systems	Mechanical Integrity	Process Safety Management
Control Rooms	Plastic Tanks	Storage Tanks
Cyber Security	Pressure Systems	Subsea Materials
Functional Safety	Pressure Testing	Third Party Inspection

Modules are independently CPD accredited providing your company/ business with the satisfaction and quality assurance of the level of training.
